

CSH TOURERS ROUTE LIBRARY

This library of routes is primarily for the use of Cycle Seahaven ride leaders for planning rides, in particular touring rides, that are to be advertised on the club calendar. Other members may use these routes for their own rides at their own risk.

Information about the categories used in this library is given in the key at the end.

KEY

Route Name This is in two parts. It starts with the destination of the refreshment stop; on longer routes this may be the lunch stop. The suffix, such as E9, gives the route name a unique identity. The letter indicates the start/finish point:

- A** - Arlington Reservoir (car park)
- E** – Exceat (Seven Sisters Forest car park)
- H** - Hailsham (South Road car park)
- S** - Seaford (Martello Tower)

The route name becomes the filename on your device should you wish to download the route to your GPS cycle computer or smartphone.

Miles The distance in miles of the entire route rounded up to the nearest whole number.

Grade This is the grade of terrain as explained on the Grading System page of this website.

Max Incline The maximum incline shown on the RWGPS route. It is not entirely accurate so please treat it as an approximate figure.

Elev (ft) This is the elevation in feet shown on the RWGPS route. It's rather misleading as it counts every small undulation of the route. In practice, you won't feel you've climbed so much.

Outward Leg via and Return Leg via This gives an indication of where the route goes.

View Click on 'View' to see the RWGPS route. Ride leaders can simply copy and paste the web address into the details of their ride for display on the club calendar.
